Global energy on
air-conditioning

Ever felt tired, sick, cold, difficulty focusing or stuffy air in your office

It's not you... it's your office's air environment.

Office environments are unhealthy

The research data is alarming. Businesses are missing out on billions of dollars in productivity and health impact. The US economy loses **US\$168bn** annually due to poor indoor air from lost productivity and health impacts.

Do new buildings solve the problem?

New buildings are designed to be thermo efficient, completely **airtight**. This **traps indoor pollutants** that arise from human breathing, printers, furniture, cleaning chemicals ...

Most Green Buildings only check for pollutants **once a year**, ignoring changes that occur over time. Ventilation systems (HVAC) can reduce the impact if they are well maintained but often aren't.

To address these problems, Green Building certifications recommend:

Improve air quality, enhance ventilation

Monitor and act in real-time

Promote clean air behaviours

With smart real-time solution

Improve safety
and wellbeing

Improve
productivity

Reduce energy
waste and cost

Meo continuously scans your environment for problems to give you localised solutions

- Collects accurate data
- Identifies the source (AI patterns)
- Provides **actionable** insights

Designed to improve safety, wellbeing and productivity with cost-effective solutions.

Communicates with BMS for immediate indoor adjustment.

Quantified wellness and productivity of your space. Save time and money.

- ✓ Identify risky or low performing spaces.
- ✓ Take action with cost-effective solutions
- ✓ Inform colleagues and customers
- ✓ Easy to **install** and use
- ✓ **Accuracy** certified by AirParif
- ✓ **Contributes** to Green Building certification

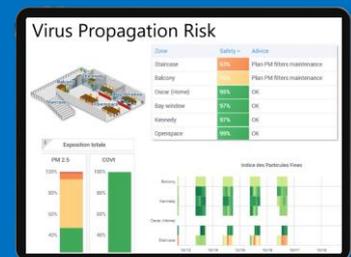

How does it work?

Continuous Data
CO₂, TVOC, PM_{2.5}, Temp, RH%

Analytics identify causes

Solutions & impact through your app

What next?

- From **USD50** per 150 sqm per month
- **Up and running** in less than 48 hours
- Immediately **take action** upon installation to create your safer more effective workplace
